

Two Parallel Economic Systems of the Early 1800s: The North and The South (A. Thompson)

Overall, as you read 7.1 and 7.2, try to incorporate the terms from the term sheet into your responses below. You may want to read both sections first, then go back to fill out the questions and chart below.

1. What technological and transportation advancements of the early 1800s led the United States into the Industrial Revolution, and WHY were they important?

Example: interchangeable parts → mass creation of same product, easier to fix

2. How were different social groups affected by the Industrial Revolution?

	SOUTH	NORTH
What was the primary product of this region?		
What people(s) did most of the work in creating that product?		

	SOUTH	NORTH
Describe the treatment and conditions of the workers.		
Where were the products sold?		
What similarities do you see between the two systems? (ie., how are they ALIKE?)		
What connections do you see between the two systems? (ie., how are they TIED TOGETHER?)
